

Intelligent Fixed Income Strategy

Investment Objective: The strategy's investment objective is to seek long-term total return while striving to generate meaningful current income. For taxable accounts, Qualified Dividend Income (QDI), which is currently taxed at a more favorable rate for upper tax brackets, is favored.

Investment Description: On July 1, 2017 Ulland Investment Advisors (UIA) created the Intelligent Fixed Income (IFI) style for clients seeking a 100% fixed income investment. IFI invests solely in fixed-income securities, predominately preferred stock. Up to 20% of the strategy may invest in corporate bonds. Some securities used in IFI have ratings below investment grade or are unrated. Preferred and debt securities used in the strategy are issued by banks, insurance companies, other diversified financials, REITs, energy and pipelines, telecommunications, technology and consumer companies. Prior to July 1, 2017, Ulland's fixed income strategy was part of Ulland's Defensive Growth style, which also included equities.

Why Intelligent Fixed Income?

- **Attractive Income Stream:** Current Yield 5.9%
- **Total Return Mindset:** Targeting 5% net return for clients
- **Tax Efficient:** 70-90% investment income is Qualified Dividend Income (QDI)
- **Broad Investment Universe:** Access to both \$25 par (retail) and \$1,000 par (institutional) preferred market
- **Boutique Size:** Ability to execute strategy efficiently and capitalize on dislocations that may arise

Strategy Allocation Target Range (as of 09/30/18)

Parent Sector Exposure	Current	Min	Max

About Ulland Investment Advisors: Ulland Investment Advisors (UIA) is a boutique investment advisory firm dedicated to building and securing our clients' wealth. For over 20 years, UIA has identified unique investment opportunities across a variety of asset classes. UIA designs separately managed accounts (SMAs) to meet the risk tolerance and return expectations for each client. UIA currently manages \$325 million, with \$140 million in our fixed income composite. Ulland Investment Advisors' account minimum is \$500,000. UIA clientele includes institutional clients (family offices, endowments and foundations) as well as high net worth individuals. The firm was founded in 1997 by James Ulland, President and CEO of the firm.

Composite Definition: The Fixed Income Composite includes all portfolios invested 100% in fixed income securities which includes cash, preferred stock, corporate bonds and other subordinated securities. The account minimum for the composite is \$150,000, with no margin. Prior to July 1, 2017 fixed income accounts were included in the Defensive Growth strategy. After July 1, 2017, all new 100% fixed income accounts were included in the Intelligent Fixed Income strategy. Portfolios enter the composite on the first day of the first full quarter of management. Portfolios are removed upon completion of the last full quarter of performance. As of 10/31/2018, the Fixed Income Composite was comprised of 119 accounts and \$145 million in assets. The Fixed Income Composite is invested predominately in U.S. issued preferred stock. Securities include both \$25 and \$1,000 issues.

Performance: Performance quoted is past performance. Past performance is not indicative of future performance. Current performance may be lower or higher than performance shown. Differences in performance versus the Index may be attributable, in part, to differences in the asset make-up of the Fixed Income Composite vs. the Index. Performance calculations are based on the reinvestment of dividends and gains unless these amounts were paid out to the client. Performance is subject to revision.

Fee: Our normal fee schedule is 1.00% on the first \$2 million, 0.75% on the next \$3 million, and 0.50% for funds above \$5 million. Individual fee arrangements may vary from this schedule.

Disclaimer: Investing involves risk; principal loss is possible. The principal risks of investing in the Strategy include interest rate risk: the value of fixed income securities are impacted by changes in interest rates. Bonds and preferred securities with longer durations tend to be more sensitive and more volatile than securities with shorter durations; bond prices generally fall as interest rates rise. Other risks include call risk, market risk and liquidity risk. Investors should consider the investment objectives, risk, charges, and expenses of this strategy carefully before investing. This and other important information can be obtained by contacting Ulland Investment Advisors.
